National Income | January 2021 to present

- Provide tailored options for Life, health insurance to potential policy holders.

Bartender

Sea Witch | August 2019 to Present

- Enhanced patrons experience by providing courtesy, service, and prioritizing on building positive relationship.

Volunteer

Patient Care | March 2019 to August 2019

- New York-Presbyterian Brooklyn Methodist Hospital
- Assisted on the Rehab and Psychiatric floor.

Assistant in Chemistry Research | 2016

- Quantum Computing Research
- Design Chemical structures that optimize quantum computers.

PROJECT

Flashcard Game

<https://stephtheitsloth.github.io/Flashcards-How-To-Tricks/>

- HTML, Flexbox, Vanilla JavaScript
- Flashcard was a solo project. I was trying to provide novice software engineers like me the opportunity to practice in a game setting. One of the biggest hurdles was to make the card flip dynamically.

Anime For Each (With a 3rd party API)

<https://animeforeach.herokuapp.com/search>

- React.JS, React Hooks, Grid, Flexbox, Heroku, GitHub, API
- Another solo project, and something that I will enjoy a lot. It is an anime website that provides a search field in which you can type any anime title, and get back a list of anime. The request is made to a third party API.

Deep Dive (Music Review App -- A team effort)

<https://music-review-frontend.herokuapp.com/>

- React/JavaScript/MongoDB/Express/React Styled-Components
- I was responsible for styling the entire website. It was a challenge that I wanted to take. It was really challenging to work in a team setting. I have learned so much.

Ivorian-Ent (Business look-up-- styling in progress)

<https://git.heroku.com/ivorian225-ent.git>(front end repo)

<https://git.heroku.com/pacific-dusk-53111.git>(backend API)

- React/Python/PostgreSQL/Django Rest
- I attempted to create a look up landing page for businesses based in the Ivory Coast. Authentication is working, but I wasn't able to finish up the project.

EDUCATIONAL TRAINING

General Assembly

Software Engineer Bootcamp April 2021:

Front End Development, Full-Stack Development, Front-End, Frameworks, APIs and Full-Stack Development

Coursera

IT Support Specialist GOOGLE CERTIFICATE Certificate Expected in June 2021:

Computer Networking, Operating System, System Administration and IT Infrastructure Services, IT Security

CUNY Brooklyn College

Bachelor in Biology Degree expected in December 2021:

Member of the National Society of Leadership and Success, Member of the Pre-Physician Assistant Society.
